

NGUYEN PHUC THANH

Hanoi, Vietnam | 033 281 2606 | thanhng224@gmail.com | <https://github.com/ThanhNg224>

Summary

Android developer with hands-on experience building and maintaining production mobile applications and SDK products, currently working in the **fintech** sector alongside major partner banks. Strong focus on **Kotlin**, **MVVM**, **Clean Architecture**, and modern Jetpack frameworks, with a track record of delivering both end-user applications and reusable SDK/host solutions across diverse domains.

Portfolio: thanhng224.github.io/react-portfolio

Education

Hanoi University of Science and Technology – HUST

B.Sc. in Multimedia Engineering (Advanced Program)

Hanoi, Vietnam

2021 – 2025

Licenses and Certifications

IELTS Academic - 7.5

Issued by IDP Education Co., Ltd

September. 2024

Technical Skills

Android: Kotlin, Java; Jetpack (ViewModel, Navigation, Room, DataStore, WorkManager); MVVM & Clean Architecture; Coroutines/Flow; Hilt

Networking & Data: Retrofit, OkHttp, REST APIs, JSON

Cross-platform: Flutter, React Native

Web/Backend: ReactJS, NextJS, NodeJS, Flask

Tools: Git, Firebase (Analytics, Crashlytics, Remote Config), Gradle, Android Studio

Experience

Kalapa JSC

Android Developer – Fintech SDK (eKYC)

Hanoi, Vietnam

June 2025 – Present

- Develop and maintain Android **eKYC SDKs** integrated into partner banking apps, including **Shinhan Bank** and **VPBank**.
- Design and build standardized **host/demo applications** to test, validate, and showcase SDK modules for partners and internal QA, following **MVVM + Clean Architecture** for maintainability and easy integration reference.
- Collaborate directly with partner banks' technical teams during SDK integration, resolving device-specific compatibility and performance issues across a wide range of Android hardware.
- Optimize real-time biometric processing pipelines using **Kotlin Coroutines** for smooth, responsive performance.

eUp Technology Joint Stock Company (eUp Group)

Android Developer – HeyJapan Language Learning App

Hanoi, Vietnam

April 2025 – May 2025

- Contributed core features to a **large-scale consumer application** (HeyJapan) using **Kotlin** and **MVVM + Clean Architecture** in a multi-module setup.
- Implemented learning flows, question engines, and dynamic UI with optimized performance across a wide range of Android devices, including low-end hardware.
- Integrated production systems including ads monetization, analytics tracking, and remote configuration for controlled feature rollout.

ATIN – Advanced Technology Innovations

Fullstack Developer (Mobile Focus)

Hanoi, Vietnam

March 2024 – April 2025

- Developed Android applications for **biometric face-terminal systems**, integrating **camera**, **NFC**, and **face recognition SDKs** with real-time **Coroutines**-based processing.
- Worked across legacy **Java/XML** and modern **Kotlin/Jetpack** stacks (ViewModel, Navigation, Room, Hilt), ensuring smooth migration to **MVVM + Clean Architecture**.
- Delivered production solutions for enterprise clients (**Viettel**, **SunGroup**), collaborating with backend and UI/UX teams to build stable, real-world deployed systems.

- Completed an intensive C++ training program covering algorithms, data structures, and OOP fundamentals.
- Gained practical experience in object-oriented programming and collaborative software development.

Projects

Below are just a few of my notable projects. Feel free to explore my GitHub for more!!!

Viettel EID/Passport Verification App – Android Kiosk Solution (Built for Viettel, based on official Figma designs) | *Kotlin, MVVM, Jetpack, ML Kit, REST API*

Team Size: 1

- Developed an Android kiosk application in **Kotlin** using **MVVM + Clean Architecture**, deployed on Joyusing Z10S Pro devices with robust lifecycle handling and hardware integration.
- Integrated manufacturer SDKs for camera, NFC reader, and biometric modules, implementing asynchronous capture/processing flows with **Coroutines** for smooth and stable real-time operations.
- Implemented a full identity verification pipeline: document capture, MRZ OCR, ML Kit image preprocessing, NFC chip reading, and face-matching via Face Engine API.
- Connected with Viettel backend systems using **Retrofit** and secure REST APIs, and integrated **VNPAY sandbox QR payment** along with digital signing modules for transaction validation.

File Recovery – Smart Android Media Restoration App | *Kotlin, MVVM, Hilt, Jetpack, Coroutines, Material 3, Ads SDK (IAA)*

Team Size: 1

- Developed a full-featured Android app that scans, previews, and restores deleted media (images, videos, audio, documents) without root access.
- Integrated **In-App Ads (IAA)** via a custom JitPack SDK for banners, interstitials, and rewarded ads as the core monetization system.
- Built with MVVM + Hilt, Coroutines/Flow for async I/O, and modern Scoped Storage APIs with robust runtime permission handling for secure media access.

Device Management System – Android OTA Agent & Monitoring Platform (Built for SunGroup's SunWorld) | *Kotlin, JavaScript, Node.js, Next.js, MongoDB*

Team Size: 2

- Developed a lightweight **Kotlin agent** using **Coroutines** for background execution, enabling silent APK installation, scheduled tasks, and fully automated OTA updates on Android-based face terminals.
- Built persistent background services to collect telemetry (CPU, RAM, storage), stream real-time status via WebSocket, and log device analytics.
- Integrated with a web dashboard (Next.js + Node.js) to trigger OTA updates, monitor device health, and manage online/offline terminals across multiple deployments.

DSoft – Spa Management Application | *Flutter, Dart, BLoC Architecture*

Team Size: 1

- Developed a Flutter-based spa management application with Clean Architecture and custom BLoC framework.
- Implemented modules for customer, staff, service, booking, and financial management, along with reporting and multi-language support.

Coffee Shop Website & Android App | *ReactJS, React Native, NodeJS, MySQL, Expo*

Team Size: 3

- Built a complete coffee shop platform with user/admin roles across a ReactJS web app and React Native Android app, backed by a NodeJS + MySQL API.
- **My Role:** Led UI and mobile development — built the ReactJS interface, integrated REST APIs, and developed the React Native Android app.
